

Results (26 points)	Score
Introduce / justify analysis	
Description of results (interpreting what results mean, in complete sentences). Watch phrasing of non-significant results.	
Correct usage of statistics (italicizing, degrees of freedom)	
Correct formatting of figures	
Organization of results (putting similar information together, using headings, etc.)	
Overall clarity and style	

Discussion (36 points)	Score
Clearly state pattern of results and interpret, being sure to refer to your hypothesis or research question.	
How results do/do not fit with theory / previous research	
Limitations of study. Don't give excuses, just state what you did & how it might be problematic.	
Implications for theory and practical application.	
Connection to introduction	
Suggestions for future research	
Overall clarity and style
